1. Applicant's election without traverse of claims 1-6, 13-22, 29-32 and 38-43 in the reply filed on March 9, 2006 is acknowledged. Claims 7-12, 23-28 and 33-37 are cancelled and claims 38-43 are newly added reply filed on January 3, 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

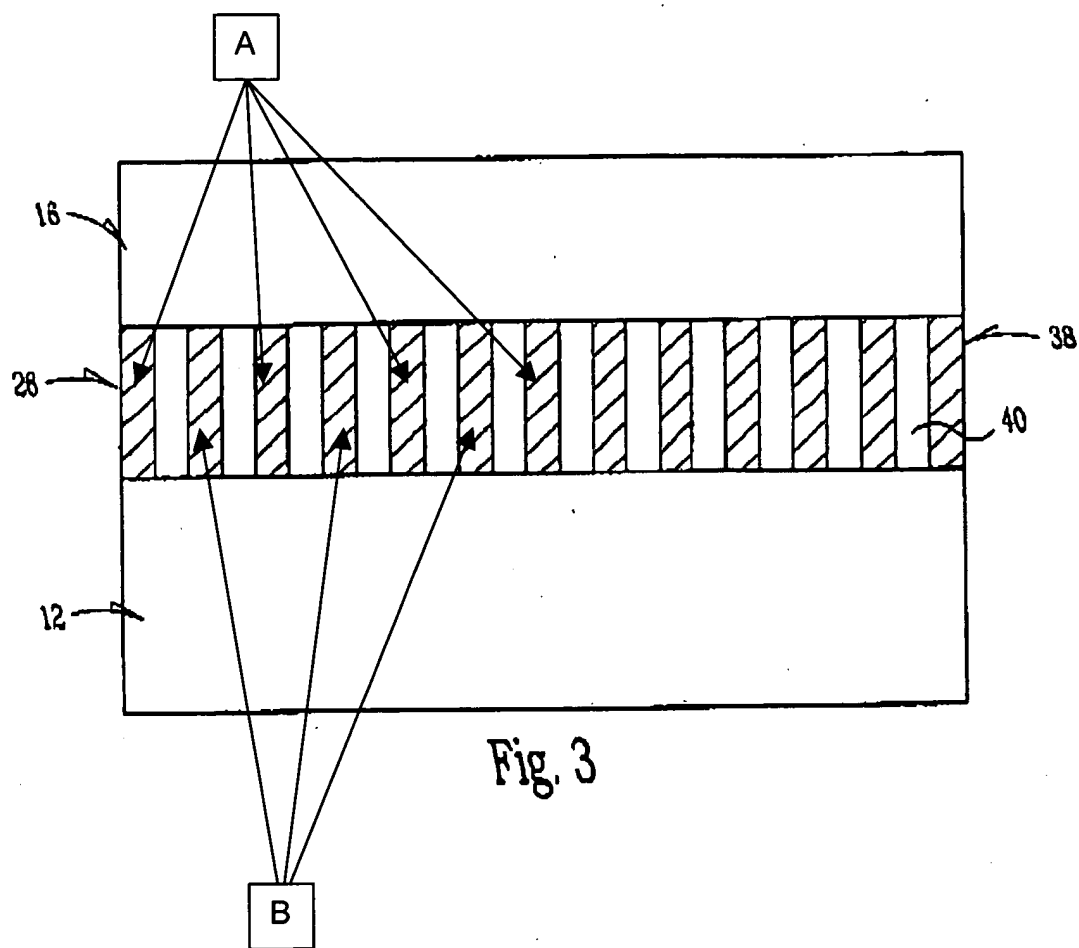

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 39 and 42- 43 are rejected under 35 U.S.C. 102(e) as being anticipated by Searls et al (US6,856,016 B2) previously applied.

Regarding claim 39, Searls et al disclosed in Fig. 1-3, an apparatus comprising:

a thermal management device [24];

a heat source [12];

Pic: Fig. 3 of Patent No. US 6,856,016 B2

a plurality of first nanostructures [A] attached to the thermal management device;
and
a plurality of second nanostructure [B] attached to the heat source, wherein the first nanostructures are interleaved with the second nanostruces [column 1 line 66 to column 2 line 9].

Art Unit: 2814

Regarding claim 42, Searls et al disclosed in Column 2 line 3 the thermal management device includes at least one of passive cooling device and active cooling device [24].

Regarding claim 43, Searls et al disclosed in column 2 line 7 at least one of the plurality of first nanostructure and the plurality of second nanostructures includes a plurality of carbon nanotubes [28].

Response to Arguments

Applicant's arguments with respect to claims 39 and 42-43 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

3. Claims 1-6, 13-22, 29-32 and 38 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, 13, 15, 29 and 30, prior art does not teach polymer comprising deoxyribonucleic acid (DNA) molecules in combination with other limitations of the claims.

4. Claims 40 and 41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2814
